OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) snapped its three month winning streak as the index slipped by 0.2% to 6,341.53. The local bourse surged early on as global developments particularly on the ever-pressing US Tariff issues continued to move markets. US and China struck a temporary trade deal that covered a 90-day pause on tariffs and a decline in reciprocal tariffs by 115 percentage points. Moreover, US President Donald Trump postponed the 50% tariffs implementation on European Union imports. On the local scene, sentiment was supported by the strong Philippine peso after trading below the Php56 level. However, gains were capped at the latter part of the month on the back of slower-than-expected 1Q GDP for the Philippines at 5.4% compared to median estimate of 5.8%. The index was dragged even further following the MSCI rebalancing at month-end.

On trading activity, the PSEi recorded an Average Daily Turnover of Php6.35 billion or 9% higher on a month-on-month basis. In terms of foreign activity, foreigners remained net sellers at US\$259 million dragged by a US\$283 million block sale of RRHI shares. Excluding the transaction, foreigners would have been net buyers.

On a per stock basis, the top three index gainers for the month include: AGI (+36.27%), BLOOM (+22.58%) and ICT (+20.52%). Meanwhile, the bottom three performers were: CBC (-16.92%), GLO (-8.81%) and ALI (-8.18%).

May 2025 saw a stable demand for Philippine local fixed income bonds. There was a steepening of the yield curve characterized by a quicker decline in the yields for the 1-5 year papers while the long-end remained high. As such, the BPI Philippine Government Bond Index returned 0.298% month-on-month, while the BPI Philippine Government Bond 1-5 Year Index returned higher at 0.457%.

Demand for the short-end Tbill and the 1-5 year can be attributed to the declining CPI where actual print for the month of April, released in May, came out at 1.4% -- lower than market expectations of 1.8%. This fueled the positive expectations that the Bangko Sentral ng Pilipinas (BSP) has room to cut policy rates at the next meeting in June with Governor Remolona stating two rate cuts are still on the table for the year. The long-end of the curve remained elevated as The Bureau of Treasury (BTr) chose to award the target issuance size of 25B fully for the 20-year FXTN auction last May 15. The highest awarded bid was at 6.618%.

We continue to expect demand for local government securities to remain strong especially for the short to medium-term bonds. The BSP's current benchmark rate is at 5.5%. The market is currently pricing in a rate cut at the upcoming June 19 meeting as the BSP projected inflation to settle within the 0.9% to 1.7% in May – as significant decline compared to the inflation print the same time last year. Rate cuts will also be supportive of local growth amidst fear of growth slowdown caused by uncertainties in US tariff policy.

Fund Performance. The Fund returned -0.28% for the month, underperforming its benchmark by 38 basis points. Year-to-date, return amounted to 0.68%, outperforming its benchmark by 104 basis points.

Fund Strategy. The Fund will be opportunistic on market dips as volatility from the global front remains given lingering uncertainties on US tariffs and escalating geopolitical tensions. The preference is for companies with leading market capitalization, good fundamentals and high-dividend paying stocks.

On the fixed income front, the fund will maintain its neutral duration given the potential uptick in inflation on the back of tariffs. We expect supply constraints and added costs to cause price increases across all major consumer items.
