OUTLOOK AND STRATEGY		
<p>Key Contributions to Portfolio Outcome: The fund delivered a positive return in Q2 2025. U.S. equity positions, high yield and covered calls were the largest contributors to total return this quarter, offset by currency management positions which detracted from total return.</p> <p>Main Portfolio Changes: In April we reduced duration using 10-year Treasury futures given concerns that US government bonds may not serve their traditional purpose as a safe haven asset in light of the potential for increased deficit spending/issuance and a potentially less friendly foreign buyer base. We also added Japanese currency exposure back in April, to serve as a hedge given the historical ballast that the Yen has offered in periods of global market volatility. We rotated some equity exposure from the US to Europe and the UK, where we see growth being less directly impacted by US tariffs. In June, we added duration to German Bund futures to mitigate rising U.S. fiscal risk, potential foreign divestment, and a relatively tighter U.S. monetary outlook versus the Eurozone.</p> <p>Positioning & Outlook: Markets ended June on a strong note, capping the most volatile quarter since early 2020. The S&P 500 advanced 5.2% over the month, bringing its quarterly return to 10.9%, and fully recovering from a nearly 15% drawdown following the April 2nd U.S. tariff announcement. The Nasdaq Composite also posted robust gains, both indices buoyed by renewed optimism around U.S. trade negotiations and increasing conviction that the Federal Reserve (Fed) will begin cutting rates later this Year. Despite pronounced volatility earlier in the quarter, underlying fundamentals remained stable. Forward 12-month earnings growth forecasts for the S&P 500 held at around 11%, down only modestly from expectations at the beginning of the year. This backdrop supported our decision to lean back into risk assets as sentiment improved. We maintained our equity overweight position to participate in the strengthening earnings momentum and fading recession risks. We shifted 0.5 years of duration from U.S. Treasury futures to German Bund futures to mitigate rising U.S. fiscal risk, potential foreign divestment, and a relatively tighter U.S. monetary outlook versus the Eurozone. While macro uncertainty remains, particularly around the timing and magnitude of policy easing, the outlook has improved. Growth remains resilient, and the cross-asset backdrop is becoming more supportive for diversified income generation. The portfolio remains well-positioned with a balance of yield, quality, and selective growth exposures designed to navigate evolving market dynamics into the second half of the year.</p>
